NEW BONANZA IN MEXICAN MINE ON THE COMSTOCK AS SEEN BY MINER AND BANKER

Carson News of Sunday says:

Bank Examiner Eugene Howell and A. M. Ardery, general manager of the V. & T. railway, spent yesterday in Virginia City, and during their stay, went through the Mexican mine, which at the present time is very much in the limelight, owing to recent flattering developments. On their return from the Comstock last evening Mr. Howell was interviewed by a News representative and made the following statement: "For the last week," said Mr. Howell, "I had heard a number of very favorable reports concerning several of the Virginia City properties and concluded that the best way to verify them would be to visit the mines myself, which I did yesterday, accompanied by Ardery."

"To say that I was agreeably surprised at what I saw in the Mexican, would be putting it mildly," remarked the new bank examiner, "and I had entered the mine expecting to see something unusually encouraging, but the ore opened up on the 2300 to 2500-foot levels was such as to make me wonder whether or not the old Comstock would again be one of the world's great mining camps. On the 2300-foot level there is a five-foot vein of rich ore opened up and on the 2500 the vein has widened to 16 feet, and averages better than \$35 per ton. From the 2500 an upraise of 50 feet has been made and all in an excellent grade of ore, which proves the Mexican ore

body to be at least 200 feet in depth, and it is exceptionally strong in the bottom. The new strike is making strong for the Union ground and, judging from the character of the walls of the vein, there is absolutely no reason why the ore should not enter that territory. I have been connected with mining properties all of my life, and with some of the biggest in the state, and I have no hesitancy in saying that the showing in the Mexican is one of the best I have ever seen and in my opinion, it will have the effect of making the mining men of the country pay much attention to the Comstock for a long time to come."

"I am one of the directors of the Belmont mine in Tonopah," said Mr. Howell, "and have been visiting that property regularly ever since the last big strike was made, but with the same amount of development work there, that mine did not begin to compare with the showing in the Mexican today, and everybody knows what the Belmont mine is now. I look to see a great revival on the Comstock as the result of the new discovery, for there is no question but that it will act as a stimulus for other companies in that camp to prosecute more vigorous development work than they have for a number of years past."

In concluding the interview, Mr. Howell stated that the future of the mining industry of Virginia City was as bright as that of any camp in the state.

COMMITTEE ON REORGANIZATION IS HOPEFUL

SHAREHOLDERS IN ELY CENTRAL HAVE ONLY TODAY TO JOIN WITH LODGE.

A final call has been issued by the reorganization committee of the Ely Central under date of April 1, copies of which have just been received here. The committee states that its efforts have been so successful that it now feels assured it will soon be able to form the new company and secure the control of the situation and come into possession of the property.

The circular warns all shareholders in the old company that those who do not participate in the reorganization plan will find their stock certificates worthless as to what reasons they have for not joining in the movement.

The committee states it has been directing its efforts to obtaining actual possession of the property and to securing for directors in the new corporation men of national reputation and high standing.

No further time beyond that set in previous circulars issued by the committee can be given and April 10 is the last day when investors in the shares of the old company will have a chance to join in the reorganization plan.

If the committee is successful, it is expected that operations under the new regime will be commenced within a few weeks and without doubt during the month of May, when development will be resumed in the Eureka shaft to locate the ore deposits expected to be found on the east side of the copper flat fault.
